

3D CAD - RHINOCEROS

Group Project

EXTERNAL ASSIGNMENT

PARAMETRIC CHAIR

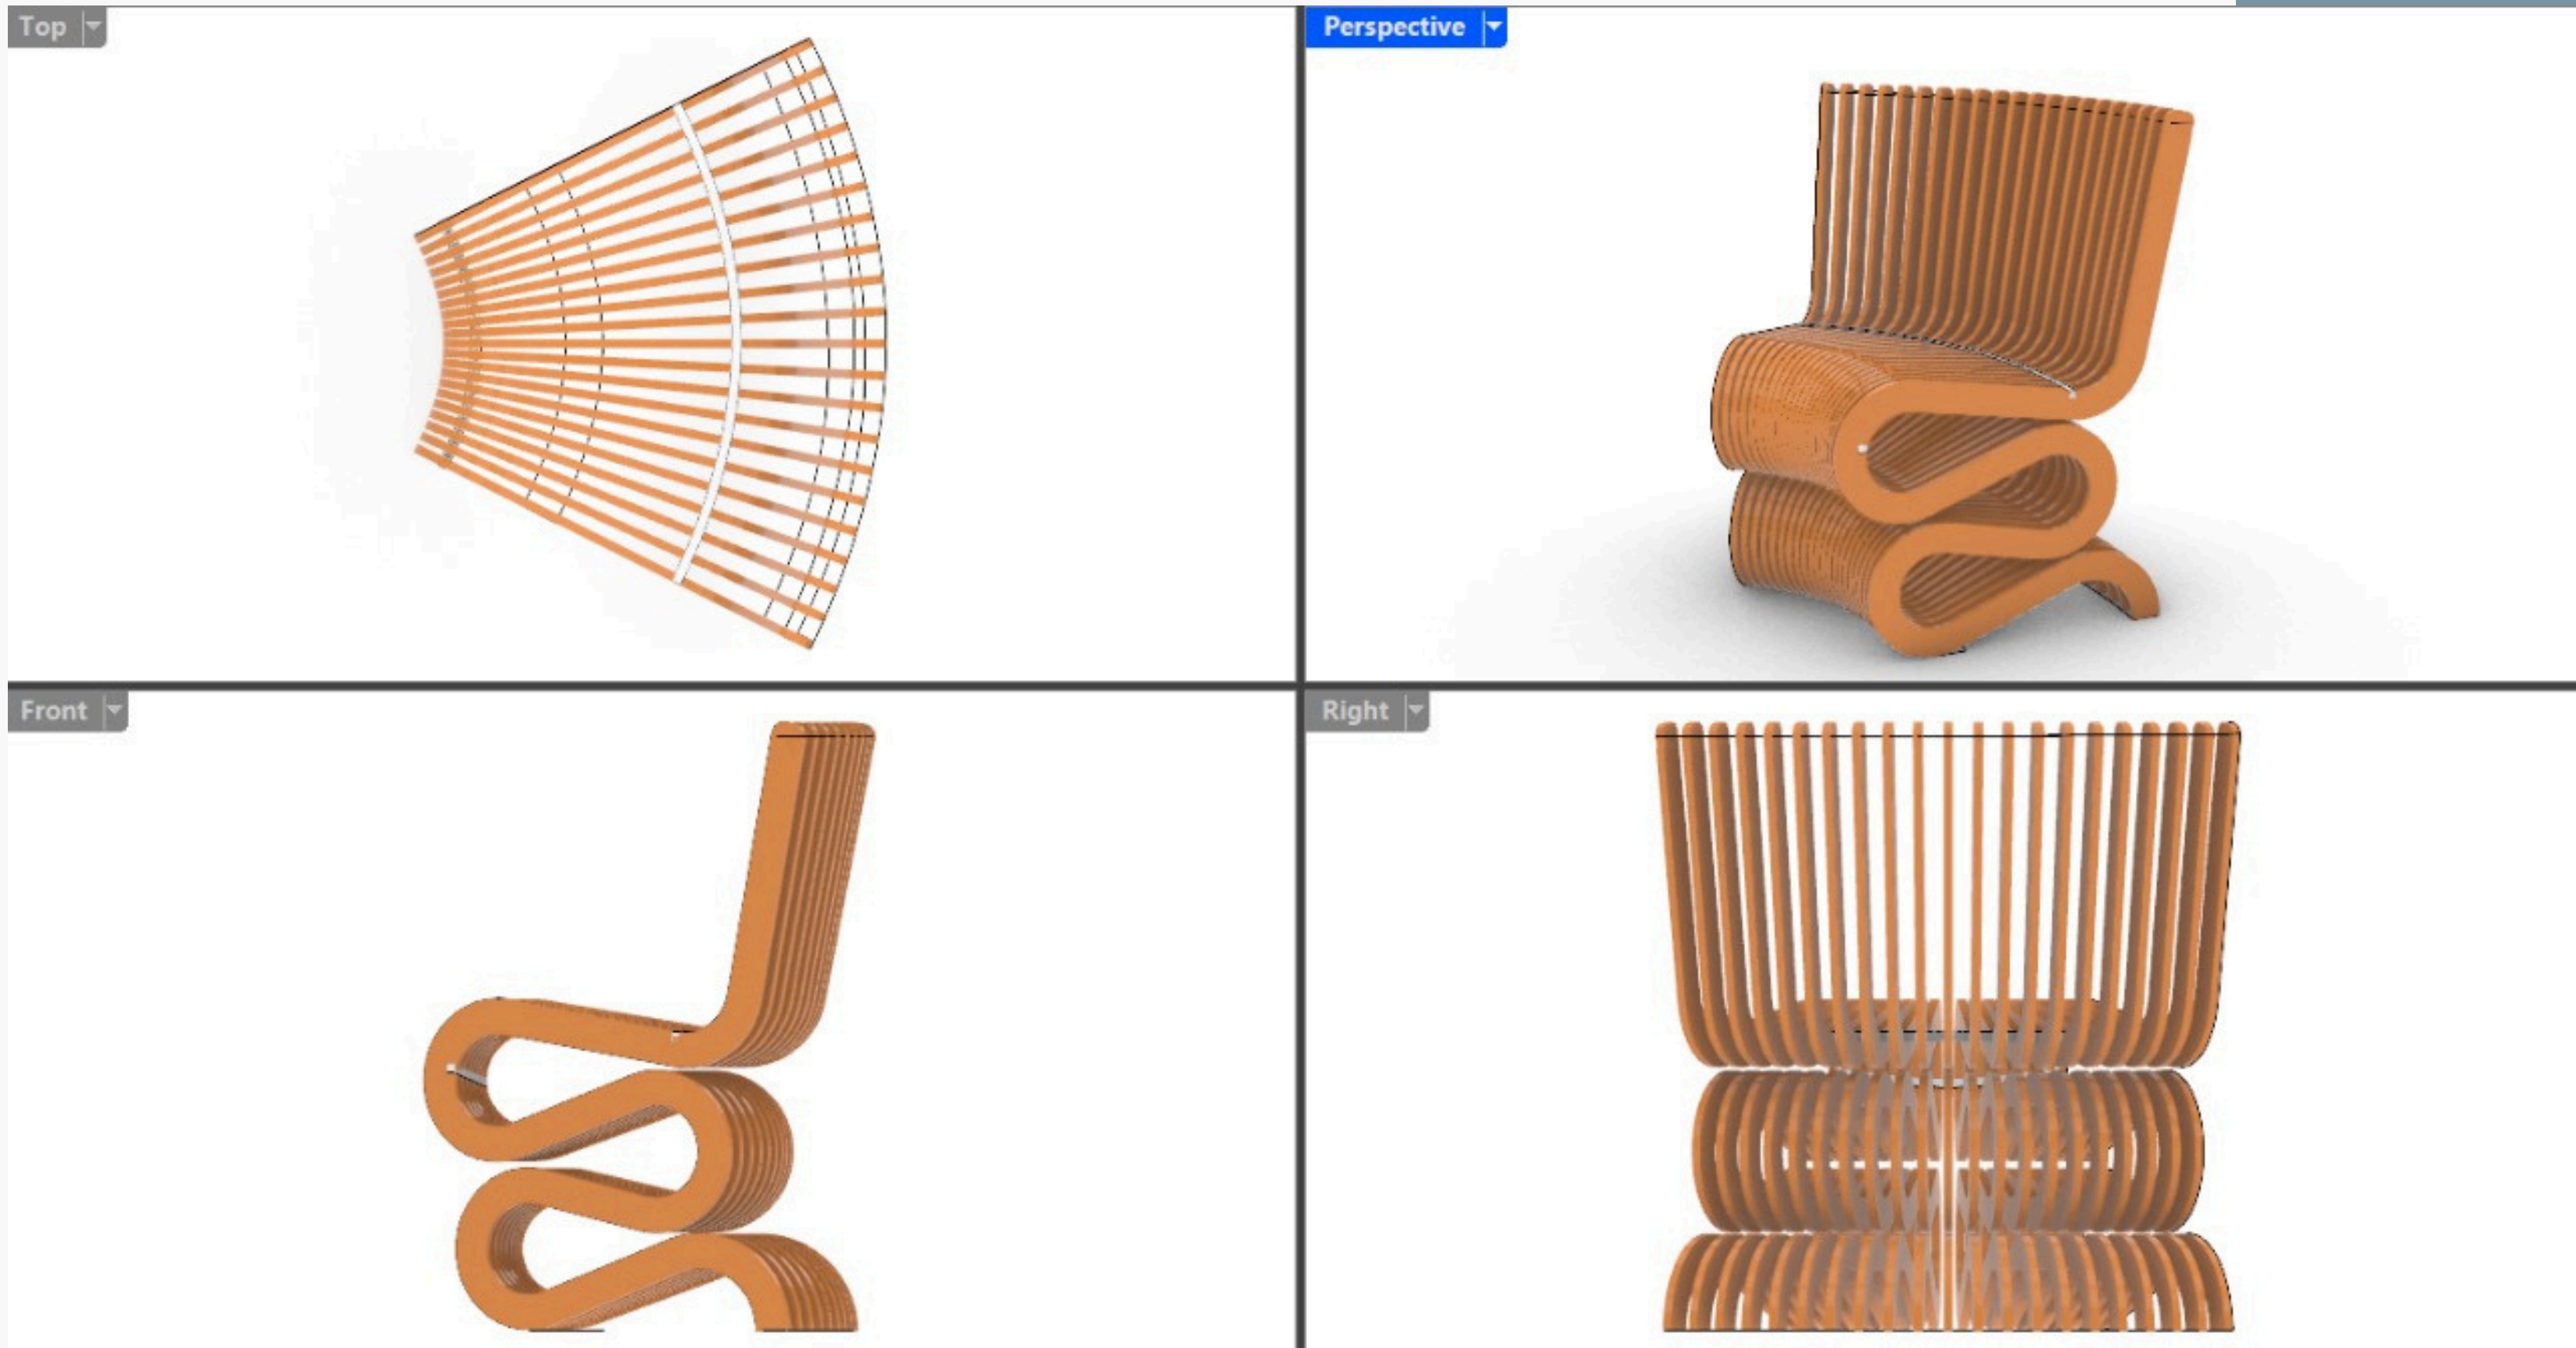

This chair is composed of a series of evenly spaced , vertically oriented slices that form a continuous wave like structure which is flowing , structural , emphasizing both form and function.

The chair also ensures ergonomic comfort and structural stability. The S - Curved design not only supports the back and seat but also provides a visually dynamic aesthetic , making it a striking piece of modern furniture suitable for contemporary interiors or design forward environments.
